Get Rid Of It
## *Project 4*
Tritens

Meeting 1:   Tuesday Oct 30th outside Spahr
Ian and Thor were there
We   divvied up the front end work between us two
whiteboarded the front end pages to plan how they would look

Meeting 2:   Saturday Nov 3rd in Lab D
Rob, Emilia, Tony, and Thor were there
We   Reviewed what we had accomplished
worked together for a few hours on aspects that required collaboration

Meeting 3:   Wednesday Nov 7th in Lab D
All of us were present
We   got together to discuss our relative progress
created a spreadsheet of features still to implement as well as features
already implemented

Meeting 4:   Friday Nov 9th in class
               Ian, Thor, and Rob were there
               We   planned our next meeting in the lab for next Monday during class

Meeting 5:   Monday Nov 12th in Lab D
               All of us were present
               We   used the cancelled class to meet in the lab
                      finalized the coding parts of the project

Meeting 6:   Wednesday Nov 14th in Lab D
               Emilia, Rob, Thor and Ian were present
               We   talked and presented our website with the company owner for feedback
                      planned our next meeting for thursday afternoon
                      did a lot of individual coding for our parts together

Meeting 7:   Thursday Nov 15th in Lab D
               Ian, Emilia, Tony and Thor were present
               We   got caught up on everything everyone was working on
                      assigned the rest of the features to be done including combing through
               code and making it more modular

Meeting 8:   Saturday Nov 17th in Lab D
               Tony, Thor, Emilia, and Ian were present
               We   kept going on the project to finish up features.
                      Changed all the px heights/widths to %'s so the site looks the same on
               any device.
                      Made the nav bar in a user account modular so we don't repeat the same
               code on all 3 tabs.
                      Worked on stopping mySQL injection attacks, forgot password steps.

Meeting 9:   Monday Nov 19th in Lab D
               All of us were present
               We   kept working on our project because the interim professor didn't show up

Meeting 10:   Tuesday Nov 20th in Lab D
               All of us were present
               We   all worked on the test suite code and separated out the documentation
requirements among us

Meeting 11:   Wednesday Nov 28th in Lab D
               All of us were present
               We   reviewed some documentation progress and found some bugs
                      worked on our presentation outline

Thor - High level overview
Ian - Bootstrap, homescreen, footer links
Rob - Create account, log in, submit item, user panel
Tony - Hashing passwords, changing email and passwords, open
database
Emilia - Show tables, how it's stored, functionality, make offer
Tony - Log back in, show offer, accept, message board
Thor - Next Steps
Questions

Meeting 12:   Wednesday Dec 5th in Lab D
                All of us were present, Tony by phone
                We   finalized documentation and recapped a successful semester
